

Class A & Class B Operator Training Course Schedule:

If you do not have Class A and Class B operators designated for your UST facility, there are only two months left. Training opportunities are winding down. After December 31, 2011, you must have trained/designated operators in order to dispense petroleum. Staffed retail facilities must also have a trained Class C operator. Without trained/designated operators after December 31, your site will be red tagged (delivery prohibition).
